

## Changing the Way People Communicate and Collaborate

Welcome to your future at work, in class, on the road, in your community and at home. As a key part of Cisco® Collaboration, Cisco TelePresence™ technology powers the new way of working, where everyone, everywhere can be more productive through face-to-face collaboration. Cisco TelePresence solutions meet your needs—from team to personal use, to specific applications for your business, and even public access, allowing you to:

- Connect face-to-face with customers, partners, and co-workers, building trust, understanding, and relationships
- Scale executives and subject-matter experts like never before, transforming your business model and creating competitive differentiation
- Increase productivity through more interactions and less travel
- Speed time to market and make decisions faster with the right resource available at the right time
- Free IT resources with ease of use and operational simplicity to focus on strategic projects instead of operational maintenance

## Cisco TelePresence for Everyone, Everywhere

### Cisco TelePresence Endpoints

Cisco TelePresence endpoints deliver an unmatched experience in quality and simplicity. We can help you find the right Cisco TelePresence endpoint for every individual and team for natural and effective communication. Our innovative portfolio includes:

- **Immersive:** Optimized or adaptive Cisco TelePresence rooms for the best quality face-to-face communications and collaboration

- **Multipurpose:** Cisco TelePresence media and collaboration solutions for the widest range of multipurpose rooms and collaboration environments
- **Personal:** Streamlined products fit for private offices, at home for telecommuting or remote locations for workers on the go
- **Solution Platforms:** Core Cisco TelePresence components for customized applications from partners for your business

With a range of applications including meetings, high-definition video recordings and broadcasting, intimate customer experiences, and remote professional services such as healthcare, the Cisco TelePresence portfolio takes interaction, communications, and collaboration to a new level.

### Cisco TelePresence Infrastructure

The Cisco TelePresence portfolio offers the most comprehensive infrastructure centered around an integrated architecture, unified communications, and any-to-any interoperability between Cisco and third-party video products and collaboration technologies. Cisco TelePresence delivers a networked multipoint switch architecture for scalability and adaptive, on-demand media services—and integration with digital media and collaboration solutions from Cisco and other companies. Key components of the Cisco TelePresence infrastructure portfolio include:

- **Management:** Comprehensive management software with integrated scheduling, network management, and reporting capabilities, including usage measurement and return-on-investment (ROI) tools
- **Conferencing:** Industry-leading switching capabilities for large, high-performance, and scalable multipoint meetings and robust transcoding technologies

- **Media services:** Any-to-any interoperability with virtually all video technologies and on-demand media services such as recording, streaming, transcoding, and translation
- **Call and session control:** Robust Cisco TelePresence session control through a comprehensive set of signaling and call-control capabilities

### Cisco TelePresence as a Service

As the leading provider of IP networks globally, Cisco is uniquely qualified to deliver secure, intercompany Cisco TelePresence connectivity for enterprise and service provider IP networks. Intercompany Cisco TelePresence solutions enable Cisco service provider partners to offer integrated scheduling support, dynamic security policy, and scalable multipoint intercompany services. Thus you can effortlessly and securely communicate with your colleagues, customers, and partners in other Cisco TelePresence locations, including public Cisco TelePresence Suites globally.

Intercompany Cisco TelePresence solutions allow you to securely connect beyond the enterprise boundary to accelerate ecosystem collaboration and client interaction. Intercompany Cisco TelePresence services offered by qualified Cisco partners support flexible

services to meet your needs, including dynamic security policy and closed user groups, encrypted meeting capabilities and scalable multipoint meet-me conferencing, online scheduling, and directory services.

- Cisco also offers a set of cloud services and applications such as Intercompany Cisco TelePresence Directory and scheduling for seamless and scalable intercompany collaboration with Cisco TelePresence systems.
- Publicly available Cisco TelePresence Suites further extend your ability to collaborate and interact with remote users and travelers at convenient public locations worldwide.
